This military standard is approved for use by all Departments and Agencies of the Department of Defense. Selection for all new engineering and design applications and for repetitive use shall be made from this document.

(D) CROSS REFERENCE OF PART NUMBERS
The screws covered by dash numbers given in MS15240, MS15291, MS15293, MS15295, MS15297 and MS15399 are cancelled after the dates indicated on the cancelled documents. Use dash numbers used in this standard. The cancelled screws cannot always replace the new screws and should be used until existing stocks are depleted. Use only the new screws for design and replacement. Dash numbers representing old and new screws are identical, making it unnecessary to prepare an interchangeability table.

(D) For changes see sheet 1.

NOTES:

- MATERIAL:** Medium carbon steel, Grade 5, in accordance with procurement specification.
- PROTECTIVE COATING:** Cadmium plating in accordance with procurement specification.
- THREADS:** The threads shall be in accordance with Screw-Thread Standards for Federal Services, Handbook H28.
- THREAD LENGTH:** Minimum thread length shall be twice the diameter plus 1/4 inch. The tolerance shall be plus 1/16 inch or 2-1/2 threads, whichever is greater. On screws that are too short for minimum thread lengths, the distance from the bearing surface of the head to the first complete thread shall not exceed the length of 2-1/2 threads for sizes up to and including 1 inch and 3-1/2 threads for sizes larger than 1 inch.
- DIMENSIONS:** All dimensions are in inches, unless otherwise specified.
- HEAD MARKING:** Heads shall be marked in accordance with MIL-HDBK-131. Raised markings are preferred, stampings are acceptable.
- PART NUMBER:** The MS part number consists of the MS number, plus the dash number.
Example: MS90725-1.
- Based on minimum ultimate tensile strength of 120,000 p.s.i. for diameters thru 1 inch; 105,000 p.s.i. for 1-1/8 inch thru 1-1/2 inch diameters; 90,000 p.s.i. for diameters over 1-1/2 inches. Tensile strengths are calculated by the stress areas indicated in Screw-Thread Standards for Federal Services, Handbook H28.
- Referenced documents shall be of the issue in effect on date of invitations for bid.
- For design feature purposes, this standard takes precedence over procurement documents referenced herein.
- Supersedes: MS15289, MS15291, MS15291, MS15295 in part, MS15297 and MS15299; (BCX12, 2.1, 3, 3.1, 3.2, 3.3, 4.2) in part; BCX12, 2.1, 4, 4.1, 4.2, 4.3, 4.8, 4.9, 10; (BCX12, 2.1, 2.2, 2.9, 10.2, 10.3) in part; BQLX12 in part, 4QLX2, 3; 9WR12, 2.1, 2.2, 3, 3.1, 4, 4.1, 8, 8.1, 9, 9.1, 10, 10.1.

This military standard is approved for use by all Departments and Agencies of the Department of Defense. Selection for all new engineering and design applications and for repetitive use shall be made from this document.
